HMP50 Miniature Humidity and Temperature Probe for OEM Applications

The HMP50 features good measurement performance in a small, rugged and simple probe.

Features/Benefits

- Miniature-size humidity transmitter
- Very low power consumption
 well suitable for batterypowered applications
- Short power-up time
- Measurement range
 0 ... 98 % RH and
 -10 ... +60 °C (+14 ... +140 °F)
- Cable detachable with standard M8 quick connector
- Rugged metal housing
- Interchangeable Vaisala
 INTERCAP® Sensor no need for recalibration
- Optional outputs and cable lengths

The Vaisala INTERCAP® Humidity and Temperature Probe HMP50 is a simple and cost effective humidity transmitter suitable for volume applications or integration into other manufacturers' equipment.

The HMP50 is ideal for a variety of applications such as glove boxes, greenhouses, fermentation chambers, data loggers, and incubators.

Installation flexibility

The probe cable has a screw-on quick connector for easy installation. Two different cable lengths are available, and customers can also use any M8 series cable of their choice.

Several outputs available

The temperature measurement is optional. Three standard voltage outputs are available.

For the RH-only model, a current interface output is available. It can be used to build a 4 ... 20 mA looppowered current output with external components (the optional current converter kit).

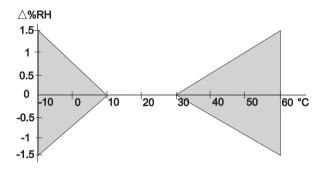

Rugged design

The aluminum body of the HMP50 is IP65-classified. The sensor is protected by a membrane filter and plastic grid, or optionally a stainless steel filter.
